SKILLS

Programming Languages:

- ❖ Angular
- ❖ Express Js
- ❖ Java
- ❖ Mongo DB
- ❖ HTML & CSS

Technologies know :

- ❖ Git and Github
- ❖ MS - Word, Excel

Soft Skills:

- ❖ Adaptability
- ❖ Communication
- ❖ Teamwork
- ❖ Video Editing

HOBBIES

- ❖ Cycling
- ❖ Singing
- ❖ Playing Chess

LANGUAGES KNOWN

- ❖ English
- ❖ Tamil

SUMMARY

Aspiring creative developer with a solid foundation in MEAN stack (Mongo DB, Express Js, Angular and Node Js) I am eager to develop my knowledge in growth-oriented atmosphere.

EXPERIENCE

2024 - Present **Packed App Developmet Associate**
Accenture Solutions Pvt. Ltd, Chennai

EDUCATION

2020- 2024 **Bachelor of Technology** **CGPA: 8.84**
(Information Technology)
Anjalai Ammal Mahalingam Engineering
College, Kovilvenni.

PROJECTS

Pizzaria Application - Angular Project

Technologies: Angular, HTML, CSS, Bootstrap, Express Js, Mongo DB

Developed a dynamic pizza ordering system as a Single Page Application (SPA) using Angular. Designed a seamless flow from 'Order Pizza' selection to 'Build Pizza' customization, allowing users to add ingredients and view real-time cost updates. Implemented a shopping cart that dynamically updates prices based on selected pizzas, ingredients, and quantity adjustments. Optimized the application for performance and responsiveness across different devices.

Agri Intellect – Empowering Farmers with Smart Agricultural Solutions

Technologies: Flask, HTML, CSS, Python,

This project is about predicting the crop yield based on historical data. This is developed using a Flask-based web application which integrates CatBoost machine learning algorithm to predict crop yields. The aim of proposed method is to predict the optimized crop yield by rainfall, quantity of nitrogen, phosphate, potassium consumption in lands for both small scale and large scale farmers for future opportunities for agriculture.
